“Üretim Next”⁽¹⁾**

⁽¹⁾ “Üretim Next” is the new era for Enerjisa Üretim that includes three main pillars in harmony; Generation, Trade and Digital. Please see page 5 for a detailed explanation.

A DISTINCTIVE, RESILIENT AND ROBUST BUSINESS

Enerjisa Üretim leverages its generation portfolio as well as its value creating business model to obtain strong financial results.

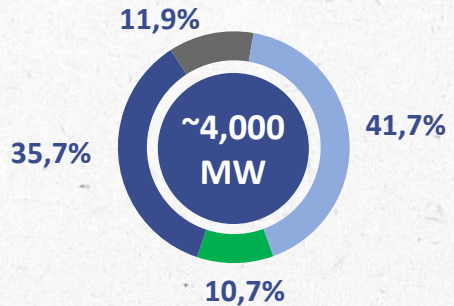

Generation Mix in Line with Türkiye

- ✓ 12.3 TWh generation in 2023
- ✓ 26 power plants
- ✓ ~58% share of domestic and renewable resources

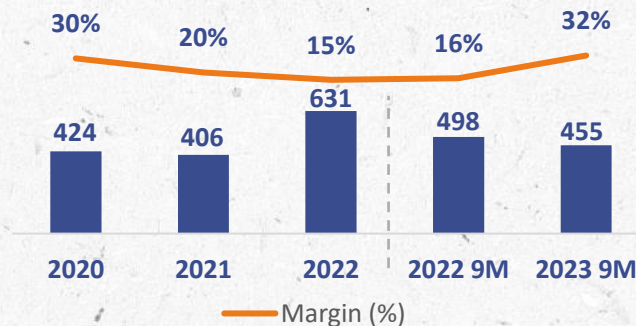

Value Creating Business Model

- ✓ ~4-5% share in Türkiye's generation
- ✓ ~36% share of trade volume of Türkiye
- ✓ ~3.2 million tons of CO₂ equivalent carbon certificate
- ✓ With "just transition" plans for thermal capacity

Installed Capacity (MW)

EBITDA⁽¹⁾ (mUSD)

Short-term Financial Targets

- ✓ ~600 m\$ EBITDA w/ strong Balance Sheet
- ✓ Hard currency driven business
- ✓ Sustainable dividend

⁽¹⁾ IFRS results without IAS 29. Excluding synthetic hedge. ~70% of hard currency driven.

⁽²⁾ Including ongoing YEKA-2 and battery investments.

VISIBLE GROWTH OUTLOOK: "ÜRETİM NEXT"

Enerjisa Üretim generates energy for a better future by respecting life and acknowledging the responsibilities of tomorrow.

GENERATION

Become «Green» through organic and bolt-on growth.

TRADE

Growth through internationalization: growth from Europe to the globe.

DIGITAL / VENTURES

Energy technologies empowered by data and industry know-how.

Generation Mix in Line with Türkiye

- ✓ Growing over and above licensed⁽¹⁾ 5,000 MW capacity
- ✓ Pioneer in green generation portfolio
- ✓ Diversification of energy resources

Value Creating Business Model

- ✓ Human capital development for global competitiveness
- ✓ Global expansion in generation, trade and digital
- ✓ European market entry in generation business
- ✓ Pursuing opportunities w/ R&D, Start-ups & VCs

Mid-term Financial Targets

- ✓ Reach ~ 1 bn\$ EBITDA
- ✓ Sustainable dividend
- ✓ Bridging the gap w/green energy company multiple

⁽¹⁾ Licensing and construction are ongoing for new capacity additions.

CLEAR MARKET LEADER IN TÜRKİYE WITH SIGNIFICANT ROOM FOR GROWTH INTERNATIONALLY

Türkiye's #1 in Leading Multi-Technology Renewables

Energy Transition Enabler via Flexible Generation Featuring Gas

International Energy & Green Commodity Trader

Energy Digitalization Solution Provider via Data and Know-How

Solid Financial Track Record, Robust Capital Structure and Dividend Potential

ATTRACTIVE TURKISH MARKET WITH STRONG LONG-TERM FUNDAMENTALS

Türkiye has strong demographics with a young population that indicates growth potential in terms of GDP, electricity demand and generation capacity.

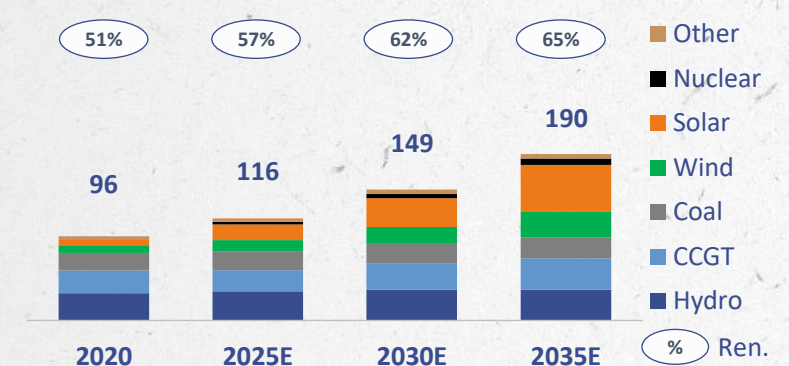

GDP Growth⁽¹⁾ (Nominal GDP, bnUSD)

Electricity Demand⁽²⁾ (TWh)

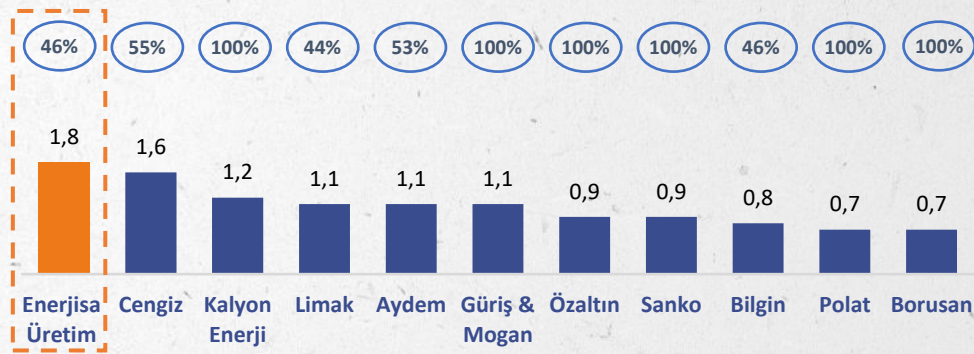

Total Installed Capacity by Technology⁽³⁾ (GW)

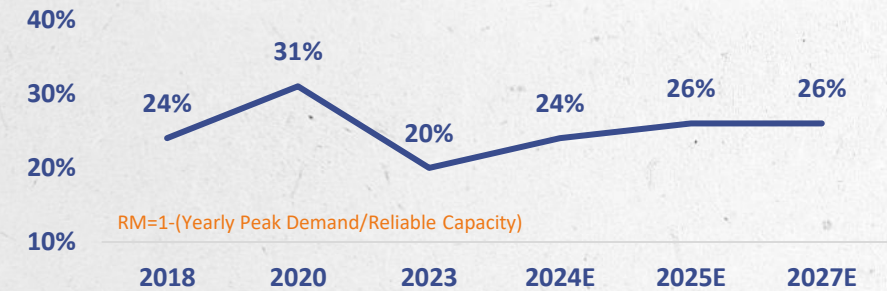

Türkiye needs to drive up its reserve margin trend to ensure supply security and leverage its solar and wind energy potential for economic growth.

Major IPPs by Installed Capacity in Renewables⁽⁴⁾ (GW, %)

Türkiye Reserve Margin Trend⁽⁵⁾

⁽¹⁾ WEO Database (IMF,2023), ⁽²⁾ TEIAS & Enerjisa Üretim assumptions, ⁽³⁾ Türkiye National Energy Plan (MENR,2023), ⁽⁴⁾ Overview of the Turkish Electricity Market (PwC, 2023), ⁽⁵⁾ Enerjisa Üretim assumptions.

GENERATION: TÜRKİYE'S #1 IN LEADING MULTI-TECHNOLOGY RENEWABLES

1,000 MW YEKA-2 WPP CURRENT STATUS:

Procurement of major equipment is completed; hence >70% of the project capex is fixed. The 1st PP (Akköy WPP, 25 MW) was commissioned in 2023. Critical permits were obtained. 750 MW is planned to be operational in 2024 and 2025. The remaining 250 MW is planned to be commissioned in 2026.

**Wind

Growth

Become «Green» through organic and bolt-on growth

Expected Portfolio in 2027

- Licensed installed capacity growth through
 - Wind power plants
 - Solar power plants
 - Hybrid energy storage projects
- Ancillary Services capabilities above sector
- Wind & solar distributed generation projects for our customers

Ongoing feasibility studies for European market entry in generation business, As well as hydrogen refinery in Bandırma to serve demand in Türkiye + Europe.

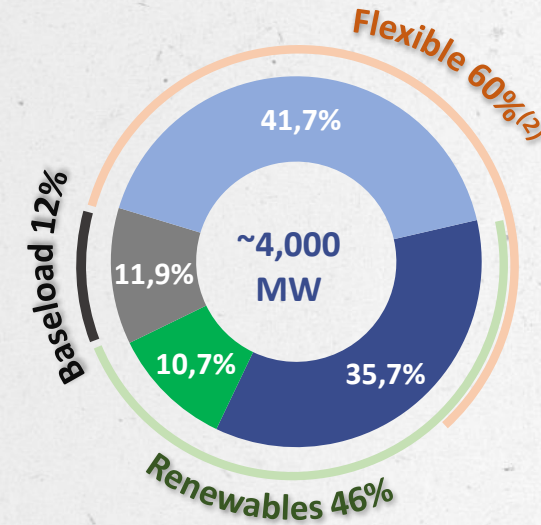

⁽¹⁾ Enerjisa Üretim's assumptions

⁽²⁾ Without 500 MW "New Projects – Storage Wind"

GENERATION: TÜRKİYE'S ENERGY TRANSITION ENABLERS

Enerjisa Üretim has a complementary flexible generation featuring gas to enable the energy transition for Türkiye.

- ✓ **Diverse energy mix:** Balancing flexible baseload generation and expanding renewables for optimal energy production.
- ✓ **Efficient CCGT assets:** Bandırma I and II located near power sink area, benefiting from cost-effective generation through optimized gas contracts.
- ✓ **Transition plan for Tufanbeyli Lignite Power Plant:** Initiating solar hybridization as the first step with to become a fully renewables-based plant by 2045.
- ✓ **Enerjisa Üretim milestone:** Secured a pre-license for 500 MW wind power plants and 500 MWh battery storage across three fields.

Natural portfolio hedge

Largest IPPs by in Türkiye by Installed Capacity⁽¹⁾ (GW)

⁽¹⁾ Enka has been excluded from the list since they tend to keep their PP's idle due to commercial reasons.

⁽²⁾ Flexible capacity includes CCGTs and HEPPs with reservoir.

Source: Overview of the Turkish Electricity Market (PwC, 2023). Installed capacities of the independent power producers have been adjusted based on the equity share of their co-owned power plants.

The trading volume has exceeded 20 TWh in the CESEE and CWE regions in 2023.

TRADE: INTERNATIONAL ENERGY & GREEN COMMODITY TRADER

Value Proposition

Global trading activities

Diversified portfolio
in trading

Enhanced markets analysis
and trading capabilities

+40 Countries in 2027

- Keep leader position in Türkiye
- Become a well-known 24/7 commodities trader
- Trading
 - Power
 - Gas
 - Carbon
 - Green Environmental Commodities

- Customer Solutions for large scaled end customers

50,000 +

Entities (SPVs) and offices are located at Amsterdam, Budapest and İstanbul.

DIGITAL / VENTURES: ENERGY DIGITALIZATION SOLUTION PROVIDER

The company has partnered with Microsoft in the EMEA region during COP28, which includes launching 'OnePact AI,' a Generative AI-based application aimed at enhancing efficiency in renewable energy production.

Value Proposition

Advanced Technology Expertise

Industry Know-How

Proven and Co-Generated Technologies

w/ Global Partners

- Differentiation through in-house products
- Providing solutions to international 3rd parties
- Business Lines
 - Business Transformation
 - Data Services
 - Cyber Security
 - Digital Energy Services
- Exploring Start-up, Venture Capital, and R&D opportunities

A trusted partner for 10+ global customers, managing 25 power plants with 2,000+ MW of installed capacity and a prominent utility company.

Entities (SPVs) and offices are located at Amsterdam and Istanbul.

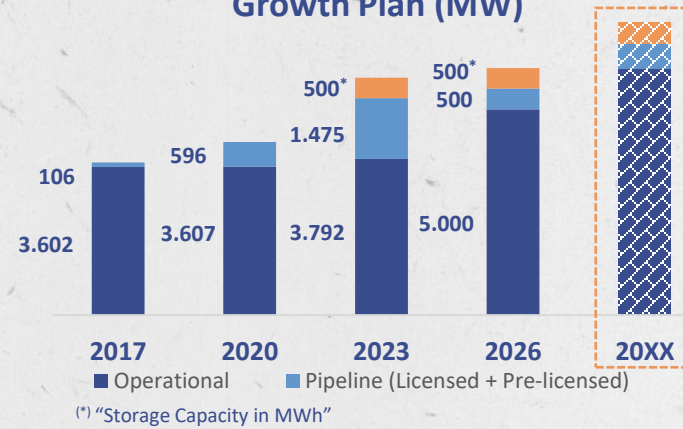

SOLID FINANCIAL TRACK RECORD, ROBUST CAPITAL STRUCTURE AND DIVIDEND POTENTIAL

Enerjisa Üretim is the sector pioneer in managing value drivers to obtain strong financial results and creates a sustainable dividend stream.

Installed Capacity & Generation (MW, TWh)

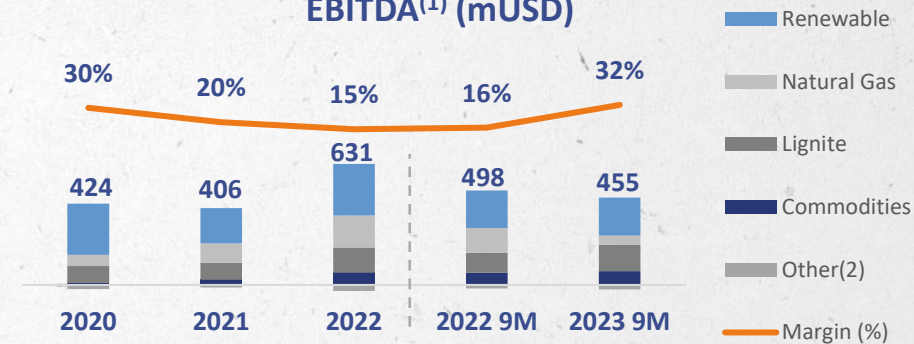

Growth Plan (MW)

Investment Portfolio's Fundamental Characteristics:

- ✓ >4-5% share in Türkiye's generation
- ✓ >60% renewable capacity
- ✓ >10% of Wind Capacity of Türkiye
- ✓ Generation abroad as an option

EBITDA⁽¹⁾ (mUSD)

Net Debt/EBITDA^{(1),(3)} Development

Dividend⁽⁴⁾ (mUSD)

⁽¹⁾ IFRS results without IAS 29. Excluding synthetic hedge. ~70% of hard currency driven.

⁽²⁾ Other impacts consist of G&A and other income & expenses.

⁽³⁾ Net Debt/EBITDA in terms of USD.

⁽⁴⁾ Please kindly note that these figures represent equivalent values, meticulously calculated in accordance with the pertinent legislation.

VALUE PROPOSITION: "CHANGES WITH US"⁽¹⁾

Enerjisa Üretim places "people" first in its culture.

VALUE CREATION STRATEGY OF ENERJİSA ÜRETİM

Just as earlier, the generation business shaped trade and digital businesses, today's new businesses are shaped around these three pillars. Enerjisa Üretim has achieved inside-out innovation in digital, now it's time to create outside-in interactions for digital products and technology.

Expanding Businesses Through Energy Ecosystem

Capturing Value through Vertical Integration While Electrification of Energy Value Chain

- ✓ Industry & Commercial:
 - ✓ Distributed Generation (in-house)
 - ✓ Carbon (via start-ups) **QUICKCARBON**
- ✓ Transportation: EV Charging & Stations (via start-ups)
- ✓ Clean Fuel: Hydrogen (in-house)

Continuing its venture capital and startup investments, Enerjisa Üretim has access to over 10k deals in this field from Turkey, the US, and the German-speaking region.

BANDIRMA ENERGY BASE: CENTER OF INNOVATION, R&D AND START-UPS

Bandırma Energy Base generates electricity from five different technologies, including battery storage and hydrogen production, positioning itself as a center that tracks new technologies and hosts various innovative initiatives.
